

IITS Accountant PLUS

A low cost, high feature product that is designed to receive and process Sharp's R.E.D. (Remote E-mail Diagnostics). **IITS Accountant PLUS** software collects the data for all copy, print, fax and scan activity by account, department code or device. Now you can easily monitor, track, compile and report on valuable data that your Sharp MFPs are communicating to you daily! Best of all, it integrates with the SharpAccountant Platform for easy upgrades without customer or reporting downtime!

Key Features

- Maximize the benefit from Sharp's free Remote E-mail Diagnostic (R.E.D) System
- Tracks copies, prints, faxes and scans by account code and/or department code
- Easily charge back costs to customers, departments or end users
- Plus+ Export to csv, comma delimited, Microsoft® Excel® and other database formats
- Plus+ Supports cost accounting on all new Sharp® MX series units
- Plus+ Automated meter collection
- Plus+ Reduce billing costs, administrative paperwork and overhead
- Plus+ Easy-to-use reporting with date ranges adds convenience and flexibility

Receive and process e-mails from multiple sources and protocols

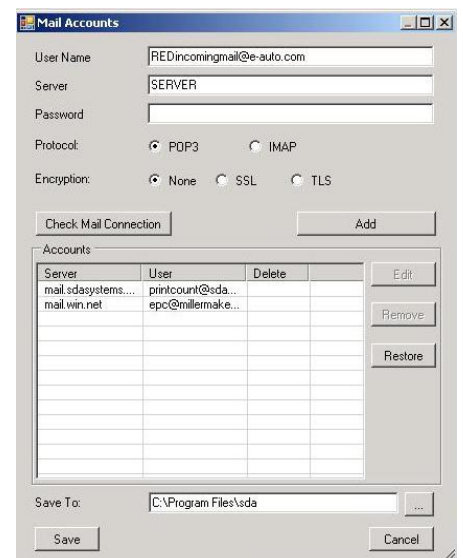

Helps eliminate calls, faxes, e-mails and dispatched "factory trained"

technicians to your customers to get meter reads

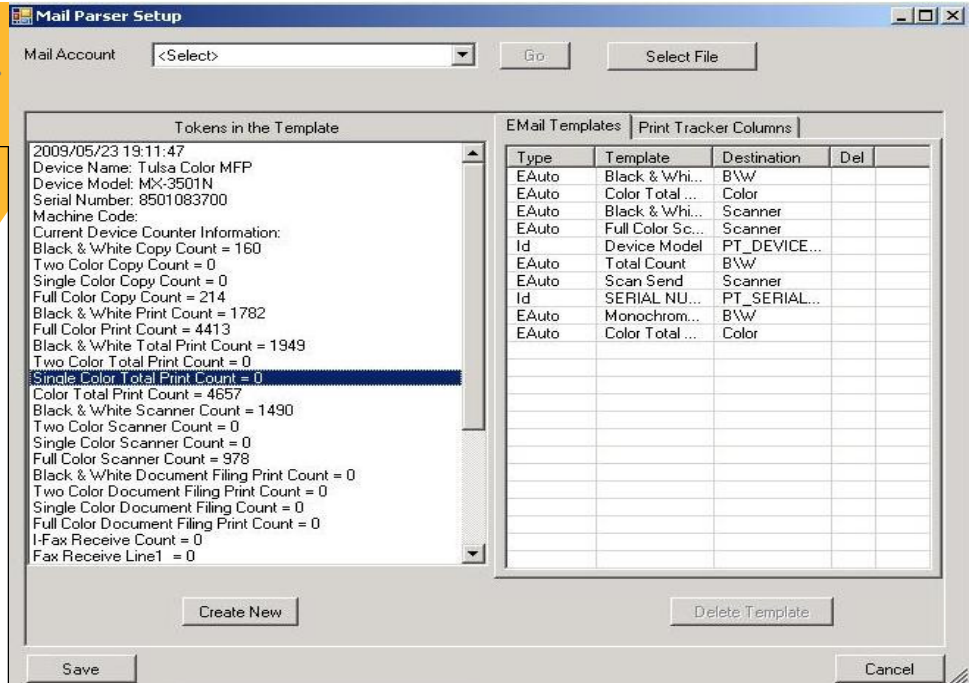

13060 Middletown Industrial Blvd.
Louisville, KY. 40223
