

## Solutions Introduction

April 2011

### Imagine IT Software Assure Scan

#### ***Features and benefits:***

- Maximize the benefit from MFP Scanning product with Assure Scan
- One touch Scanning of documents into Assure Scan or your existing database
- Barcode separator pages eliminated with Assure Scan Batch input feature
- No OCR needed to recognize pages and file directly to your database
- Documents stored in Assure Scan, search, email, print and annotate
- Custom work available to link these images to any third party software database

#### **Business Challenge**

Customers that are wanting to convert paper documents into digital images (Tiff or PDF) for storage into their existing software systems. Certain documents fit the standard for either using barcodes or OCR to recognize the form, but what about Vendor's forms that you do not have control over? Typical customer is using older technology either barcode separator sheets or zone OCR to capture information from those forms. The barcode separator sheets use extra paper take time to put sheets in place and do not always read the barcode. Zonal OCR works only for forms that have the same data in the exact same place so OCR the whole sheet, which takes time and has high failure rate, which causes you to manually key in the information. Using Assure Scan eliminates both the need for barcode sheets or OCR to input your files into our repository and/or your existing database.

## Target Market

Assure Scan is targeted toward any customer looking to implement a digital solution over filing and handling paper to lookup customer's information. Automatically load the MFP with the batch number via our Web portal and start scanning with 100% accuracies.

## Selling Propositions

Assure Scan offers users a host of benefits, among them being...

- ▶ *Flexible input scanning options:* Users can upload digital files directly, or create custom batch input scanning, generating a batch number that they enter into the MFP, and then scan.
- ▶ *Input Index Fields:* The system allows you to setup as many index fields as needed to input your vendor or customer files.
- ▶ *Database integration:* Imagine IT software will integrate Assure Scan leading third party databases. (Call for a list of packages)
- ▶ *Batch Scanning:* Once set up, Assure Scan will automatically batch scan any type of document without using barcode or OCR to track information. This is done by telling the MFP how many pages, jobs you're scanning and where they are going in our repository or your existing database.
- ▶ *Searching:* Once images are scanned into the system you can search by many different fields, email, and print or add annotation notes directly from our viewer.

## Features

Imagine IT Software's Assure Scan allows resellers to add a feature to the MFP that can help win more deals. Every customer wants to be able to eliminate paper and track their customers and vendors in a more efficient manner. Assure Scan with the entry level repository is the most cost effective way to get the customer started. Then Imagine IT can help with integrating the Assure Scan into their existing software workflow processes. At that point the end user can use their existing software package that they are familiar with and recall images directly from that software product.

*Jay Johnson President Plumbers Supply Company says; scanning vendor's invoices from Assure Scan directly into our Prophet 21 ERP package is a very powerful feature when you do not have to change your ERP package or the workflow it takes the learning curve down to zero! I would recommend Imagine IT Software Assure Scan to everyone looking to reduce the amount of paper they are dealing with.*

Assure Scan works two different ways, input digital files directly into your repository or use your twain enabled scanning device to input files directly into your existing database. Both are very easy to use and a straight forward approach to document imaging.

## Pricing and Compatibility

Assure Scan base price starting at \$1,995 for the Server plus \$195 per MFP attached to server.

The solution is compatible with all networked MFPs. For integrations into your existing CRM, ERP software packages please call us at 502.254.3400 ext: 314

## **System Requirements**

Microsoft Windows Server 2003, Server 2008, with IIS and SQL Express or higher plus .NET Framework installed and running.
